Production

Covid-19
Guidelines

Covid-19 Guidelines

We have designed October2020 to work really well in lots of different places and in lots of different ways. However, there are likely going to be laws, rules and guidance in place that you'll need to consider.

To take part in October2020 you must agree to follow all local and national government guidance to prevent the spread of COVID-19. This guidance is regularly changing and you must take responsibility to carry out your October2020 performance in line with all laws, regulations or local guidance.

The Boundless team are continually monitoring any changes and will be in touch should we believe your October2020 may not be able to go ahead as planned.

Remember: Hands, face, space

Keep washing your hands regularly

Wear a face covering in enclosed spaces

Stay at least 2 metres apart from people outside your household/bubble - or 1 metre with a face covering

If you have coronavirus symptoms:

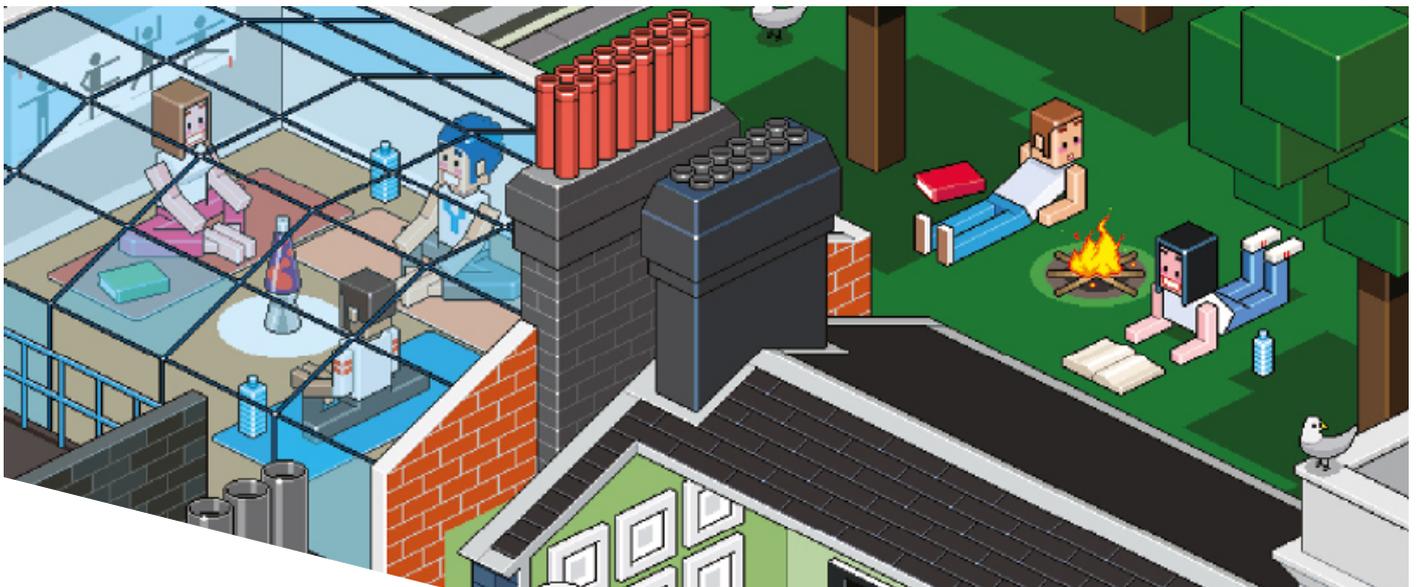

a high temperature

a new, continuous cough

a loss of, or change to, your sense of smell or taste

Get a test and stay at home

If this means you have to postpone your experience of October2020 until November - that's okay! The performance date can be flexible and we'll happily work with you to make sure that a future date can work for you.

Covid-19 Guidelines

Organising your event:

Read the lockdown rules for your area. You can find those by [clicking here](#), under the section 'Areas with local restrictions'.

In some areas you will only be able to have members of your household attend your event. This is totally fine and it will be a brilliant way to spend a unique evening together doing something different!

If you are allowed to invite friends over for your event, make sure you follow all rules around the number of attendees (see [Seeing friends and family below](#)), maintain their social distance and follow all other relevant guidelines.

During your event:

Follow the hands, face, space guidance

All attendees should stay distanced from anyone outside of their household/bubble (see [Social Distancing below](#)).

Try to avoid passing items back and forth between members of different households/bubbles. If you need to pass things around, make sure to use hand sanitiser or wash your hands.

Government rules explained

Social distancing

To reduce the risk of catching or spreading coronavirus, try to keep at least 2 metres away from people you do not live with. Social

distancing is essential to stop the spread of the virus, as it is more likely to spread when people are close together. An infected person can pass on the virus even if they do not have any symptoms, through talking, breathing, coughing or sneezing.

When with people you do not live with, you should also avoid: physical contact; being close and face-to-face; and shouting or singing close to them. You should also avoid crowded areas with lots of people; and touching things that other people have touched.

Where you cannot stay 2 metres apart you should stay more than 1 metre apart, as well as taking extra steps to stay safe. For example:

wear a face covering: on public transport and in many indoor spaces, you must wear a face covering by law, unless you are exempt

move outdoors, where it is safer and there is more space

if indoors, make sure rooms are well ventilated by keeping windows and doors open

You do not need to socially distance from anyone in your household, meaning the people you live with. You also do not need to socially distance from someone you're in an established relationship with, or anyone in your legally-permitted support bubble if you are in one.

Covid-19 Guidelines

Seeing friends and family

When seeing friends and family you do not live with you should meet in groups of 6 or less.

In England, this limit of 6 includes children of any age.

You should also:

follow social distancing rules when you meet up

limit how many different people you see socially over a short period of time

meet people outdoors where practical: meeting people outdoors is safer than meeting people indoors because fresh air provides
